

STEPS TO DO

1. Apply Data Wrangling processes on given dataset (missing values, redundant features etc...) as discussed in class.
2. Provide visual evidence (plots, charts etc...) for each process you are going to apply on and why?
 - 1-Split the data into Training (80%) and Testing(20%).
 - 2-Apply regression model on the following data (original iris, my iris, your clean iris).
 - 3- Compare the results and generate a detail report.
